“Exposure
to secondhand smoke can result
in a **25 to 30** percent
increase in the risk of coronary
heart disease.”

— *In an October 2009 report, [Secondhand Smoke Exposure and Cardiovascular Effects](#), the Institute of Medicine underlines this Surgeon General's 2006 Warning.*

Memorial is committed to creating a healthier community. Therefore, we don't allow any smoking or tobacco use on our campus. If you see anyone using tobacco here at Memorial, please let a team member or manager know. To learn more about our smoking policy, please contact your Manager, Executive Director, or Vice President. Or, read the full policy by clicking the “Tobacco Use on Memorial Properties” link on the Memorial intranet home page.
